SOS
In an emergency, simply by click the SOS button. The location can be tracked easily by the GPS satellites and an alert will be sent instantly to your chosen recipients via notification on the app and email.

Tracking
Add unlimited devices in the Letstrack application for tracking your family's cars and bikes or a fleet of various vehicles like cars, vans, trucks, cabs etc. across the Globe. It gives you real-time view and history of all your vehicles on one easy to use screen.

Engine Cut
Engine-Cut is a premium feature. If you see your vehicle moving when it shouldn't be, you can take control with just one click to immobilize the vehicle from the palm of your hand. Whether used at night for added security or in an emergency, this is a must have feature.

Real Time Tracking
Track your friends, family, employees as well as colleagues with the real-time tracking of Letstrack tracking devices. This feature enables you to track in the present time with exact location instantly.

24 Hour History
Do not have time to track your friends, family, employees as well as colleagues in real-time? You can view a 24hour history on a single screen and never worry about them again.

Parking Alerts
Set up parking alerts within the app to get a notification when your vehicles are parked in certain zones.

Zone Alerts
Letstrack tracking app enables you to create zones for tracking your friends, family, employees as well as colleagues. It alerts you every time they enter or exit the specified area.

Air Con On/Off
Get notified whenever the AC is switched ON/OFF. This feature is hugely beneficial for people who hire drivers for cabs or to pick up and drop off their children.

Engine On/Off
Get notifications via this feature to check whether the engine is ON or OFF. The status of the engine is sent to you by instant notification.

Speed Alerts
Set your own speed limits and get alerts whenever it is exceeded. You can benefit from this feature from the Letstrack tracking app. Get alerts instantly and track all your friends, family, drivers, employees as well as colleagues if required.

Location on Demand
Whichever mode your tracker is in, the location on demand feature allows you to fetch it's real time position.

Sleep Mode
After being, stationary for 10 minutes, your tracker will go into sleep mode. This increases the time between charges. When you move again, the built in motion sensor automatically wakes the tracker up.

Unplug Device
This feature allows you to get alerts when the device is disconnected from the vehicle. The inbuilt battery that is present in this device enables it to send alerts.

Waterproof
The device's waterproof build quality gives an extra layer of protection to the device to ensure years of problem free use.

Towed Alarm
With this feature, you get alerts when your car is towed away anytime and anywhere. This feature works when the engine is on or off.

Value Screen
See the average value of fuel consumption, average distance travelled, average speed and so much more on this screen. This fantastic feature enables you to save money by seeing key data linked to each vehicle you track.

Recover Offline GPS Data
This device has a unique feature to store offline GPS data, which means it will store the tracking device locations even when your device is offline (GPRS unavailable and GPS available) and post the offline historic date to sever as soon device is online and connected to GPRS.

Alert Me
This feature helps you track movement of your vehicle on a specific journey. Whenever the vehicle stops for more than 5 minutes during a journey where the feature is switched on. The alerts can be dismissed or snoozed straight from the app. This is a vital feature is you are relying on other people to transport family members or valuables.

Anti-Theft Alarm
Safe mode allows the user to activate an Anti-theft alert. You can switch on safe mode for your device through app to be sent an alert every time the engine is switched on.

Anti-Theft
Upon activation, It prevents your car from being stolen by switching the engine off when someone tries to switch it on.

Accident Alert
Sensor detects changes in the pace of the car with respect to the time and sends an alert message.

60 Days History
Your online web portal will show you upto 60 days of GPS history and all other reports like distance travelled and maximum speed.

Driver Behaviour
The built in motion sensor in your device, combined with the GPS data, enables our app and web platforms to calculate a driver behaviour score. This amazing feature helps you monitor certain drivers and helps increase safety.

Info Graphs
Our beautiful information graphs add extra content to our value screen. Being able to view extended data through easy to read graphs and other graphics gives a fantastic visual aid to maximize the use of all the features Letstrack offers. View information like distance travelled, average speed, maximum speed, engine on time, average stop time and number of stops.

Police Alert
In a step towards making the country safe, we are the first-of-a-kind to add a Police alert button . We automatically call the nearest police station to the vehicle and send them for assistance.
